

# Power Amplifier

## Model: PA-8G-12G-10-EN

8-12GHz 10W CW

Ultrabroad frequency range, high performance and exceptional RF characteristics

### Features:

- Frequency range: 8-12GHz
- High output power at saturation, 10W Min.
- High gain, 40 dB Min.
- 50 Ohm Matched Input / Output.

### Applications:

- Cellular
- PCN
- GSM
- ISM
- Lab Test

### Product Overview:

The PA-8G-12G-10-EN is a power amplifier with a minimum small signal gain of 40 dB and a minimum Psat of 10W across the frequency range of 8 to 12 GHz. The DC power requirement for the amplifier is +28 VDC/3 A. The input and output port configuration offers coax adapter structure with SMA female.

## Electrical Specifications at 25°C:

| Parameter                  | Min | Typ | Max | Units |
|----------------------------|-----|-----|-----|-------|
| Frequency range            | 8   |     | 12  | GHz   |
| Small Signal Gain          | 40  | 42  |     | dB    |
| Small Signal Gain Flatness |     | ±2  |     | dB    |
| Output P1dB                |     | 38  |     | dBm   |
| Output Psat                | 40  | 41  |     | dBm   |
| Harmonic                   |     | -15 |     | dBc   |
| Input VSWR                 |     | 1.5 | 2   | :1    |
| DC Voltage                 |     | 28  |     | V DC  |
| DC Supply Current          |     | 3   |     | A     |
| Impedance                  | 50  |     |     | Ohms  |

## Mechanical Specifications:

| Parameter                       | Value                                                       | Notes |
|---------------------------------|-------------------------------------------------------------|-------|
| Operating Temperature*          | -40°C to +50°C                                              |       |
| Non-operating Temperature*      | -50°C to +60°C                                              |       |
| Relative humidity               | 95                                                          | %     |
| RF Input/Output Connector       | SMA Female/SMA Female                                       |       |
| DC Bias                         | Solder Pin                                                  |       |
| Altitude                        | 10,000                                                      | feet  |
| Shock / Vibration(MIL-STD-810F) | 25g rms (15 degree 2KHz) endurance, 1 hour per axis         |       |
| Shock(non operating)            | 20G for 11msc half sin wave,3 axis both directions          |       |
| Dimensions W x H x D            | 60*60*11.5(Without heatsink)<br>150*127*74.5(With heatsink) | mm    |
| Weight                          | ≤200                                                        | g     |

\*Note: For a wider temperature range, please consult the manufacturer.

## Absolute Maximum Ratings:

| Parameter             | Value                |
|-----------------------|----------------------|
| Supply Bias Voltage   | +29 V                |
| RF Input Power        | +5 dBm               |
| ESD sensitivity (HBm) | Class 0, passed 150V |

## Outline Drawing:
